New York Oxford
OXFORD UNIVERSITY PRESS
1998

Contents

I Introduction **3**
I.1 About the Source Code 6

II Getting Started **9**
II.1 Geostatistical Concepts: A Review 9
II.1.1 The Random Function Concept 11
II.1.2 Inference and Stationarity 12
II.1.3 Variogram 13
II.1.4 Kriging 14
II.1.5 Stochastic Simulation 18
II.2 GSLIB Conventions 20
II.2.1 Computer Requirements 20
II.2.2 Data Files 21
II.2.3 Grid Definition 22
II.2.4 Program Execution and Parameter Files 23
II.2.5 Machine Precision 24
II.3 Variogram Model Specification 24
II.3.1 A Straightforward 2D Example 29
II.3.2 A 2D Example with Zonal Anisotropy 30
II.4 Search Strategies 32
II.5 Data Sets 37
II.6 Problem Set One: Data Analysis 40

III Variograms **43**
III.1 Measures of Spatial Variability 43
III.2 GSLIB Variogram Programs 47
III.3 Regularly Spaced Data `gam` 50
III.4 Irregularly Spaced Data `gamv` 53
III.5 Variogram Maps `varmap` 55
III.6 Application Notes 57
III.7 Problem Set Two: Variograms 62

IV Kriging **63**
IV.1 Kriging with GSLIB 63
IV.1.1 Simple Kriging 64
IV.1.2 Ordinary Kriging 65
IV.1.3 Kriging with a Trend Model 66
IV.1.4 Kriging the Trend 69
IV.1.5 Kriging with an External Drift 70
IV.1.6 Factorial Kriging 71
IV.1.7 Cokriging 73
IV.1.8 Nonlinear Kriging 75
IV.1.9 Indicator Kriging 76
IV.1.10 Indicator Cokriging 86
IV.1.11 Probability Kriging 87
IV.1.12 Soft Kriging: The Markov-Bayes Model 88
IV.1.13 Block Kriging 92
IV.1.14 Cross Validation 94
IV.2 A Straightforward 2D Kriging Program `kb2d` 95
IV.3 A Flexible 3D Kriging Program `kt3d` 96
IV.4 Cokriging Program `cokb3d` 100
IV.5 Indicator Kriging Program `ik3d` 103
IV.6 Application Notes 106
IV.7 Problem Set Three: Kriging 108
IV.8 Problem Set Four: Cokriging 115
IV.9 Problem Set Five: Indicator Kriging 116

V Simulation **119**
V.1 Principles of Stochastic Simulation 119
V.1.1 Reproduction of Major Heterogeneities 122
V.1.2 Joint Simulation of Several Variables 123
V.1.3 The Sequential Simulation Approach 125
V.1.4 Error Simulation 127
V.1.5 Questions of Ergodicity 128
V.1.6 Going Beyond a Discrete CDF 134
V.2 Gaussian-Related Algorithms 139
V.2.1 Normal Score Transform 141
V.2.2 Checking for Bivariate Normality 142
V.2.3 Sequential Gaussian Simulation 144
V.2.4 LU Decomposition Algorithm 146
V.2.5 The Turning Band Algorithm 147
V.2.6 Multiple Truncations of a Gaussian Field 148
V.3 Indicator-Based Algorithms 149
V.3.1 Simulation of Categorical Variables 151
V.3.2 Simulation of Continuous Variables 152
V.4 p-Field Simulation 155
V.5 Boolean Algorithms 156

V.6 Simulated Annealing 158
V.6.1 Simulation by Simulated Annealing 159
V.6.2 Postprocessing with Simulated Annealing 166
V.6.3 Iterative Simulation Techniques 167
V.7 Gaussian Simulation Programs 169
V.7.1 LU Simulation `lusim` 169
V.7.2 Sequential Gaussian Simulation `sgsim` 170
V.7.3 Multiple Truncations of a Gaussian Field `gtsim` 174
V.8 Sequential Indicator Simulation Programs 175
V.8.1 Indicator Simulation `sisim` 175
V.8.2 p-Field Simulation `pfsim` 181
V.9 A Boolean Simulation Program `ellipsim` 182
V.10 Simulated Annealing Programs 183
V.10.1 Simulated Annealing `sasim` 183
V.10.2 An Annealing Postprocessor `anneal` 187
V.11 Application Notes 189
V.12 Problem Set Six: Simulation 191

VI Other Useful Programs **199**
VI.1 PostScript Display 199
VI.1.1 Location Maps `locmap` 201
VI.1.2 Gray- and Color-Scale Maps `pixelplt` 202
VI.1.3 Histograms and Statistics `histplt` 204
VI.1.4 Normal Probability Plots `probplt` 206
VI.1.5 Q-Q and P-P plots `qpplt` 207
VI.1.6 Bivariate Scatterplots and Analysis `scatplt` 208
VI.1.7 Smoothed Scatterplot Display `bivplt` 210
VI.1.8 Variogram Plotting `vargplt` 211
VI.2 Utility Programs 211
VI.2.1 Coordinates `addcoord` and `rotcoord` 211
VI.2.2 Cell Declustering `declus` 213
VI.2.3 Histogram and Scattergram Smoothing 214
VI.2.4 Random Drawing `draw` 222
VI.2.5 Normal Score Transformation `nscore` 223
VI.2.6 Normal Score Back Transformation `backtr` 226
VI.2.7 General Transformation `trans` 227
VI.2.8 Variogram Values from a Model `vmodel` 230
VI.2.9 Gaussian Indicator Variograms `bigaus` 231
VI.2.10 Library of Linear System Solvers 232
VI.2.11 Bivariate Calibration `bicalib` 235
VI.2.12 Postprocessing of IK Results `postik` 236
VI.2.13 Postprocessing of Simulation Results `postsim` 239

Appendices

A Partial Solutions to Problem Sets **241**
A.1 Problem Set One: Data Analysis 241
A.2 Problem Set Two: Variograms 253
A.3 Problem Set Three: Kriging 266
A.4 Problem Set Four: Cokriging 271
A.5 Problem Set Five: Indicator Kriging 283
A.6 Problem Set Six: Simulations 296

B Software Installation **325**
B.1 Installation 325
B.2 Troubleshooting 327

C Programming Conventions **329**
C.1 General 329
C.2 Dictionary of Variable Names 330
C.3 Reference Lists of Parameter Codes 336

D Alphabetical Listing of Programs **339**

E List of Acronyms and Notations **341**
E.1 Acronyms 341
E.2 Common Notation 342

Bibliography **347**

Index **363**
